GAME ANALYTICS

₹ TalkingData 用数据说话

接入指南 3.0

最后修正:2014-08-28

Cocos2dx-Lua SDK 接入指南

一、SDK 的接入

- 1. Cocos2dx-Lua SDK 适用于 Cocos2d-x 3.0 以上版本。
- 2. 按照 Cocos2d 的接入指南将 Cocos2d 的 SDK 导入您的工程,并按照接入指南进行配置。
- 3. 将 TalkingDataGA_LuaBindings 文件夹中的 10 个文件复制到您的工程目录中的/frameworks/cocos2d-x/cocos/scripting/lua-bindings/auto 路径下。
- 4. 在您的工程/frameworks/cocos2d-x/cocos/scripting/lua-bindings/manual/ CCLuaStack.cpp 文件,添加上面的 5 个.hpp 头文件。

```
#if (CC_TARGET_PLATFORM == CC_PLATFORM_IOS ||
CC_TARGET_PLATFORM == CC_PLATFORM_ANDROID)
#include "lua_cocos2dx_TalkingDataGA_auto.hpp"
#include "lua_cocos2dx_TDGAAccount_auto.hpp"
#include "lua_cocos2dx_TDGAMission_auto.hpp"
#include "lua_cocos2dx_TDGAVirtualCurrency_auto.hpp"
#include "lua_cocos2dx_TDGAItem_auto.hpp"
#endif
```

5. 在 CCLuaStack.cpp 文件的 init 方法中调用 lua 注册方法。

```
#if (CC_TARGET_PLATFORM == CC_PLATFORM_IOS ||
CC_TARGET_PLATFORM == CC_PLATFORM_ANDROID)
    register_all_cocos2dx_TalkingDataGA(_state);
    register_all_cocos2dx_TDGAAccount(_state);
    register_all_cocos2dx_TDGAMission(_state);
    register_all_cocos2dx_TDGAVirtualCurrency(_state);
    register_all_cocos2dx_TDGAItem(_state);
#endif
```

二、SDK的调用

1. TalkingDataGA

TalkingDataGA:setVerboseLogDisabled()

TalkingDataGA:onStart("user_app_key", "channel_Id")

local eventData = {key1="value1", key2="value2", key3="value3"}

TalkingDataGA:onEvent("event1", eventData)

TalkingDataGA:setLocation(39.9497, 116.4137)

local deviceId = TalkingDataGA:getDeviceId()

TalkingDataGA:onKill()

2. TDGAAccount

账号类型

--匿名帐户 kAccountAnonymous --显性注册帐户 kAccountRegistered --新浪微博 kAccountSinaWeibo kAccount00 --00 帐户 kAccountTencentWeibo --腾讯微博 kAccountND91 --91 帐户 --预留1 kAccountType1 kAccountType2 --预留 2 --预留3 kAccountType3 kAccountType4 --预留 4 kAccountType5 --预留5 --预留6 kAccountType6 kAccountType7 --预留7 --预留8 kAccountType8 --预留9 kAccountType9 --预留 10 kAccountType10

性别

kGenderUnknown = 0, --未知 kGenderMale = 1, --男 kGenderFemale = 2 --女

TDGAAccount:setAccount("user001")

TDGAAccount:setAccountName("张三")

TDGAAccount:setAccountType(TDGAAccount.kAccountRegistered)

TDGAAccount:setLevel(2)

TDGAAccount:setGender(TDGAAccount.kGenderFemale)

TDGAAccount:setAge(29)

TDGAAccount:setGameServer("国服 2")

3. TDGAMission

TDGAMission:onBegin("新手引导")
TDGAMission:onCompleted("新手引导")
TDGAMission:onFailed("新手引导", "角色死亡")

4. TDGAVirtualCurrency

TDGAVirtualCurrency:onChargeRequest("order001", "大号宝箱", 100, "CNY", 1000, "AliPay")
TDCAVirtualCurrency:onChargeSuccess("order001")

TDGAVirtualCurrency:onChargeSuccess("order001")

TDGAVirtualCurrency:onReward(5, "新手奖励")

5. TDGAItem

TDGAItem:onPurchase("helmet1", 2, 25)
TDGAItem:onUse("helmet1", 1)
